AI MADE EASY FOR YOUR BUSINESS

The problem

Tackle the daily work that slows you down

AI built for your industry

- ✓ We augment your existing tools (pharmacy system and patient portals). We do not replace them.
- ✓ Patient explanations, refill messages, and outreach in clear steps, not a blank ChatGPT tab
- ✓ Same workflow every time. Enter Rx context once, move to the next step. No re-typing between apps
- ✓ Human review before every send. Drafts only, not autopilot.

What we solve

Time · Money · Priority

- ✓ Time: hours back on counselling scripts and refill outreach
- ✓ Money: refills retained when patients understand their medications
- ✓ Priority: finish patient messages that pile up at the counter

AI MADE EASY FOR YOUR BUSINESS

What we built

One login, pharmacy apps, and everyday business tools

Your company workspace

- ✓ One business account
- ✓ Pharmacy industry chosen once
- ✓ Team logins by plan

Pharmacy Apps

- ✓ Prescription intake and medication explainer
- ✓ Patient communication, prior auth, refill reminders

Everyday Tools

- ✓ Client Relationship Reminders and Bulk Email Processor
- ✓ Documents and interaction checks

How It Feels at the Counter

- ✓ Open Explain a medication, run step one, tap Continue. The next app opens with your draft.
- ✓ Medication Explainer, Patient Communication, and AI Email Automation: same path every patient
- ✓ Your admin connects your AI account once (OpenAI, Together, Groq, xAI, and more)
- ✓ We augment your existing tools (pharmacy system and patient portals). We do not replace them.

Keep what already works

Your existing tools, plus a writing and email layer

Your pharmacy system

Rx records, inventory, and billing stay where they are

Patient portals & IVR

Your existing refill and pickup tools

EZ4YouTech.com

Counselling scripts, patient messages, and email. Same path each time.

Sound familiar?

Staff paste Rx details into ChatGPT with no pharmacist review trail

Free ChatGPT or Copilot

- ✗ Open a blank chat and re-explain every medication from scratch
- ✗ Copy explanation, patient message, and email in separate steps
- ✗ **Free ChatGPT or Copilot may use your prompts for training and model improvement**
- ✗ **You are tied to one provider and one personal account**

With EZ4YouTech.com

- ✓ One patient workflow: same steps every time with Continue
- ✓ Explain a medication: Medication Explainer, Patient Communication, AI Email Automation
- ✓ **Your company workspace and your AI accounts. We do not train on your client data**
- ✓ **Your admin connects your provider once: OpenAI, Together, Groq, xAI, and more**

AI MADE EASY FOR YOUR BUSINESS

How it works

Three steps for your team. No IT project required.

1

Connect once

- ✓ Your admin links your company's AI account once
- ✓ The whole office shares one secure workspace

2

Explain a Medication

- ✓ Medication Explainer → Patient Communication → AI Email Automation
- ✓ Tap Continue between steps. Same path every patient.

3

Try free

- ✓ 2-month pilot with platform fee waived
- ✓ Test on real Rx counselling before you decide

You pay your AI provider directly. Our fee covers the apps and workspace, not your token usage.

Walkthrough 1: Explain a Medication

Scenario 1

A patient picks up a new Rx. They need plain language before they leave.

- ✗ Counselling scripts take too long when the queue is deep.
- ✗ Refill and pickup messages are rewritten from scratch every day.
- ✗ Prior auth letters wait until someone has a quiet hour.

Solution 1: Patient Workflow

Three steps, same path every patient.

- ✓ 1 · Medication Explainer: Patient-friendly counselling script
- ✓ 2 · Patient Communication: Pickup or refill message draft
- ✓ 3 · AI Email Automation: Send patient email or copy to Outlook

Explain the medication, draft the patient message, and send or paste in minutes.

Demo 1: Explain a Medication

Live on the platform · About 3 minutes · Starter plan and above

- ✓ Open Explain a Medication
- ✓ Medication Explainer, Patient Communication, AI Email Automation
- ✓ Tap Continue between steps. Same path every patient.

Walkthrough 2: Client Follow-Up

Scenario 2

Birthdays and anniversaries slip when daily patient work stacks up.

- ✗ You mean to send birthday notes, but client work wins every week.
- ✗ Each email is written from scratch or copied from an old template.
- ✗ Your CRM has the dates. Turning them into send-ready drafts still takes time.

Solution 2: Client Reminder Workflow

Three steps from CSV to sent email.

- ✓ 1 · Upload CSV: Rows ready for draft generation
- ✓ 2 · Review Drafts: Edit anything before you approve
- ✓ 3 · Send: Send approved emails from your account

Review drafts, send all due reminders, or set auto-send and forget the follow-up pain.

Demo 2: Client Reminders

Live on the platform · About 2 minutes · Growth plan and above

- ✓ Open Client Relationship Reminders
- ✓ Upload your client CSV and review draft emails.
- ✓ Approve and send from Microsoft 365.

Walkthrough 3: Inbox Backlog

Scenario 3

Saved emails and replies pile up faster than you can write them.

- ✗ Leads and client threads wait in your inbox or saved folder.
- ✗ Starting each reply from scratch eats the hour you needed for client work.
- ✗ Copy from ChatGPT still means paste, fix tone, and send one at a time.

Solution 3: Bulk Email Workflow

Three steps from inbox to sent replies.

- ✓ 1 · Import: Messages queued for drafting
- ✓ 2 · Review Drafts: Edit any message before you approve
- ✓ 3 · Send: Send from Microsoft 365

Batch draft replies, approve once, send from your inbox.

Demo 3: Bulk Email

Live on the platform · About 2 minutes · Full plan and above

- ✓ Open Bulk Email Processor
- ✓ Upload saved emails or sync inbox, review AI drafts
- ✓ Approve the batch and send.

Q & A

Quick answers, then your questions

How is this different from ChatGPT?

- ✓ Same workflow every time. Steps connect with Continue. Work stays in your company workspace.

Do you replace our existing software?

- ✓ No. We augment your pharmacy system and patient portals.

What about client reminders and bulk email?

- ✓ Client Relationship Reminders and Bulk Email Processor are on the platform today, on higher plans. We demo both live.

What does it cost after the free trial?

- ✓ Platform fee from \$29–\$99/mo founding rates; AI usage is billed by your provider separately.

Which plan fits a small team?

- ✓ Starter: Setup admin + up to 2 app users. Growth: up to 5. Full adds Bulk Email Processor for larger teams.

Is my client data safe?

- ✓ Your AI accounts and rules stay yours. We do not resell prompts. Your admin connects providers once.

How long does setup take?

- ✓ About 15 minutes for admin to connect AI once; staff can run patient workflows the same day.
